No. of Functional Features Included in the Solution

Functional feature inventory

Project: AI WeatherWise API   Track: AI-ML & GEN-AI Track

Prepared: 07 October 2026   Team ID: Not provided

Maximum Marks: 5

Team Members & Assigned Roles

Team Member	Role
Jai Bharath A	Team Lead & Lead Backend/API Architect
Mukesh Balaji	Generative AI & Prompt Engineering Engineer
Yadagiri Mani	Database & Data Engineering Specialist
Deepak G	Security, Testing & Reliability Engineer
Naveen	API Integration, Documentation & Demonstration Engineer

S.No	Feature	Description	Module	Status
1	User Registration	Creates account with unique email and salted bcrypt password hashing.	authController / User model	Done
2	User Login & JWT	Validates credentials and issues signed 30-day token.	authController	Done
3	Protected Profile	Returns current user only after Bearer-token verification.	authMiddleware + auth route	Done
4	Live Weather Proxy	Fetches city weather with deterministic fallback.	weatherService	Done
5	Saved Locations CRUD	Create/list/update/delete favorite locations with ownership checks.	locationController / Location	Done
6	Gemini Weather Summary	Transforms metrics into concise natural-language explanation.	aiService	Done
7	AI Recommendation	Produces outfit, commute and hydration advice.	aiService	Done
8	Fallback & Error Resilience	Local rules and centralized error responses protect core flows.	services + middleware	Done

Feature-to-Team Ownership

Member	Primary features	Secondary responsibility
Jai Bharath A	1–4	Architecture and integration
Mukesh Balaji	6–7	Prompt quality and AI fallback
Yadagiri Mani	5	Schema/index/data integrity
Deepak G	2–3,8	Security, testing and reliability
Naveen	All	Documentation, regression evidence and demo

Feature Completion Principle

A feature is considered complete only when its endpoint behavior, failure path and documentation are all represented. This prevents a visually impressive AI feature from being treated as complete when authentication, data isolation or testing remains unfinished.
