Project Executable Files & Deployment Specification

Submission checklist for evaluator execution

Project: AI WeatherWise API   Track: AI-ML & GEN-AI Track

Prepared: 07 October 2026   Team ID: Not provided

Maximum Marks: 3

Team Members & Assigned Roles

Team Member	Role
Jai Bharath A	Team Lead & Lead Backend/API Architect
Mukesh Balaji	Generative AI & Prompt Engineering Engineer
Yadagiri Mani	Database & Data Engineering Specialist
Deepak G	Security, Testing & Reliability Engineer
Naveen	API Integration, Documentation & Demonstration Engineer

Item	Expected location / artifact	Purpose	Owner
Source code	src/ (controllers, models, routes, services, middleware)	Complete backend implementation	Jai
README	README.md	Setup, environment and API execution guide	Naveen
Dependencies	package.json + lock file	Reproducible Node environment	Jai
Database	src/models + src/config/db.js	Schema and MongoDB connection	Yadagiri
Environment template	.env.example	Required configuration without secrets	Naveen + Deepak
API tests	Thunder Client / Postman collection	Repeatable endpoint validation	Naveen + Deepak
Deployment	Dockerfile / Render configuration if used	Portable deployment	Jai + Naveen

Environment & Security Checklist

- Provide placeholders—not real secrets—in .env.example.
- Set JWT_SECRET to a strong secret in deployment.
- Set OPENWEATHER_API_KEY and GEMINI_API_KEY only in the server environment.
- Restrict MongoDB network access appropriately.
- Never commit .env or credentials to Git.

Evaluator Quick Start

- Install the documented Node.js version and dependencies.
- Create environment variables from .env.example.
- Start MongoDB Atlas access and verify network permissions.
- Run the server and execute the documented Thunder Client collection.
- Test one live weather request and one forced fallback scenario.
- Test AI summary/recommendation and inspect the returned JSON.
