Team Involvement in Demonstration

Individual contribution and presentation roles

Project: AI WeatherWise API   Track: AI-ML & GEN-AI Track

Prepared: 07 October 2026   Team ID: Not provided

Maximum Marks: 1

Team Members & Assigned Roles

Team Member	Role
Jai Bharath A	Team Lead & Lead Backend/API Architect
Mukesh Balaji	Generative AI & Prompt Engineering Engineer
Yadagiri Mani	Database & Data Engineering Specialist
Deepak G	Security, Testing & Reliability Engineer
Naveen	API Integration, Documentation & Demonstration Engineer

S.No	Team Member	Role	Section presented	Contributed idea	Status
1	Jai Bharath A	Team Lead & Lead Backend/API Architect	Intro, architecture, weather proxy	Express MVC, API routing, weather integration, system coordination.	Active
2	Mukesh Balaji	Generative AI & Prompt Engineering Engineer	Gemini summary + recommendations	Gemini SDK, prompt engineering, output formatting, Gen-AI fallback.	Active
3	Yadagiri Mani	Database & Data Engineering Specialist	MongoDB + favorites CRUD	Schemas, indexes, CRUD, data integrity and ownership queries.	Active
4	Deepak G	Security, Testing & Reliability Engineer	Auth + testing	bcrypt, JWT, negative tests, latency and failure-path validation.	Active
5	Naveen	API Integration, Documentation & Demo Engineer	Regression, documentation + wrap-up	Thunder Client collection, README, evidence, demo orchestration and Q&A support.	Active

Team Coordination Notes

The team should present as one integrated engineering unit. Each presenter owns a section but must understand the end-to-end flow sufficiently to answer cross-module questions.

Contingency Plan

- If a presenter is unavailable, the paired technical owner takes over.
- Keep a local mock weather path ready.
- Keep a pre-tested API collection and known-good environment variables.
- Do not expose credentials or private database connection strings during the demo.
