Brainstorming & Idea Prioritization

From raw weather data to actionable contextual intelligence

Project: AI WeatherWise API   Track: AI-ML & GEN-AI Track

Prepared: 07 October 2026   Team ID: Not provided

Maximum Marks: 5

Team Members & Assigned Roles

Team Member	Role
Jai Bharath A	Team Lead & Lead Backend/API Architect
Mukesh Balaji	Generative AI & Prompt Engineering Engineer
Yadagiri Mani	Database & Data Engineering Specialist
Deepak G	Security, Testing & Reliability Engineer
Naveen	API Integration, Documentation & Demonstration Engineer

Ideation Objective

The team explored AI/ML and Gen-AI ideas that solve a clear daily problem while remaining realistic for a student-built REST API. Weather was selected because numerical observations are abundant, but users still need interpretation: what to wear, whether to carry an umbrella, how to plan a commute, and how to stay hydrated.

Idea	User Value	Gen-AI Fit	Feasibility	Decision
AI WeatherWise API	Turns weather observations into human advice	High	High	Selected
AI Campus Event Planner	Suggests schedules from constraints	High	Medium	Backup
Smart Expense Advisor	Categorizes spending and gives advice	Medium	High	Backup
AI Study Environment Advisor	Uses weather/time to suggest study conditions	Medium	High	Merged concept

Why WeatherWise Won

- Clear problem-to-solution story: raw meteorological data → contextual advice.
- Strong Gen-AI component without requiring model training from scratch.
- External API integration demonstrates real-world backend engineering.
- Fallback design makes the prototype resilient when cloud APIs are unavailable.
- Scope is modular: authentication, weather, favorites, AI summaries and recommendations.

Team Ideation Ownership

Member	Ideation responsibility
Jai Bharath A	Team Lead ; identify risks, user needs and implementation ideas.

Member	Ideation responsibility
Mukesh Balaji	Generative AI ; identify risks, user needs and implementation ideas.
Yadagiri Mani	Database ; identify risks, user needs and implementation ideas.
Deepak G	Security, Testing ; identify risks, user needs and implementation ideas.
Naveen	API Integration, Documentation ; identify risks, user needs and implementation ideas.
